<b>Intermediate</b> , Expert P.U. college <i>Percentage: 95.5%</i>	2019 - 2021 Mangalore,India
<b>Matriculate</b> , Saint Theresa's School <i>Percentage: 91%</i>	2007 - 2019 Mangalore,India

## Projects

- **Hackathon-RNSIT**

Our goal was to design an interface that was simple and intuitive, making it easy for anyone to navigate, regardless of their technical background. By focusing on clear layouts, intuitive navigation, and accessible language, we ensured that users could effortlessly manage their finances. My responsibilities included implementing responsive design principles, optimizing the site for various devices, and ensuring a seamless user experience, ultimately making finance management accessible to all. - **Inventory Management**

In our database management project, I developed a simple and user-friendly system to store inventory items and track sales. The interface was designed to be intuitive, making it easy to access and use. This straightforward system streamlined inventory management and sales tracking for users of all skill levels. ## Experience

- **Video editor (Non-Technical Team), VentureX JSSSTU** As a video editor in VentureX, I contributed to various intriguing projects, focusing primarily on creating engaging reels. I also developed video edits for both the college and club events, enhancing our digital presence and storytelling. This role allowed me to explore creative editing techniques and collaborative projects.

05/2021 - 06/2022

- **Freelancing at EditBox, Mysuru**

A service-based e-commerce company, EditBox, which significantly improved my outlook on life and technology, driving me to explore the potential by experiencing myself for a fact, what computers can achieve with human intervention. EditBox is a service-based company where our team offers solutions such as building web pages, marketing management, social media analytics, video editing, animations, and model development. We provide comprehensive support to our clients, maintaining and updating their websites and offering creative and technical services tailored to their needs.

06/2022 - 10/2023

## Technical Skills

**Tools/Languages:** C, JAVA, Front end web development.

**Worked On:** SQL, JAVA, Web development.

**Frameworks:** Reactjs.

## Achievements

---

- Winner of mock coding and placement drive, Programming Community, JSSSTU. A technical event with coding, technical interview, and HR round.
- Champions of Basketball, Shri Jagadguru Memorial tournament held at JSSSTU on DEC 8th.
- I achieved the 2nd runner-up position at the state-level under-17 karate tournament. This competition was a testament to my dedication and training, showcasing my skills and perseverance. Competing against talented peers, I gained valuable experience and demonstrated my commitment to excellence in martial arts.
